Welcome to this 3-day preparation program to become a CSEP (Certified Systems Engineering Professional) or ASEP (Associated Systems Engineering Professional).

This program offers you the fastest and most convenient way to obtain your certificate!
Let us help support your preparations to apply and take the test to become a Certified Systems Engineering Professional (CSEP) or an Associated Systems Engineering Professional (ASEP) according to the INCOSE SEP certification program.

About the course

Welcome to this 3-day preparation program to become a CSEP (Certified Systems Engineering Professional) or ASEP (Associated Systems Engineering Professional). The course is arranged by Syntell for the Swedish and European markets.

The preparation program has been designed to support professionals in submitting a successful application for approval and in exploring the INCOSE Handbook (3.2.2), upon which the CSEP exam is based. Systems Engineers, Project Managers with extensive Systems Engineering experience are appropriate candidates.

To become a CSEP you need to have both relevant education and experience. If you don’t have enough experience, you can apply for the ASEP certification (Associated Systems Engineering Professional), which only comprises a knowledge test (same test for CSEP and ASEP). The ASEP is recommended also for those who will interact with systems engineers or project managers.

Syntell will be available to candidates with the help they need when they need it. We will assist in preparing for the exam, answer any last-minute questions, and ensure that the preparations are the best they can be.

INCOSE and the Certification

The International Council on Systems Engineering (INCOSE) established its Professional Certification Program to provide a formal method for recognizing the knowledge and experience of systems engineers. This certification is similar to the certification programs that already exist for project managers.

Certification is a formal process whereby a professional community, such as INCOSE, warrants that a person has achieved competence in certain skills.

Certification renewal

The CSEP certification is valid for 3 years from the date of award and may be renewed every three years. To update your CSEP you need new knowledge and experience corresponding to 120 PDUs (Personal Development Units). The PDUs can be collected by, for example, attending Syntell’s open courses, conferences or collecting university points.

Course dates, price and registration

Register online on www.syntell.se. There you will also find complete terms and conditions for registration. If you register before the “Early bird” date, you get 5% discount on the course fee!
