

Project Review

- A guiding star to success

Do you want to understand your project´s ability to meet the objectives and deliver business value?

The project review provides you with a structured and objective review of your project and results in a set of recommendations to improve effectiveness.

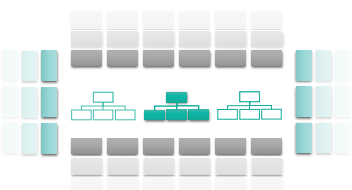

Project Review

You are in a situation where you have a stake in the delivery of projects on time, budget and with the expected quality. To do this, you need increased knowledge of the projects ability to succeed with the current setup.

Project review

Project Review is a packaged service based on the vast experience of Syntell in the delivery of successful projects. It provides you with a structured and objective review of the status of your project as well as its ability to meet the set objectives. The review is based on a holistic approach taking both the project and its context (enterprise) into account. For this Syntell Capability Model is used to ensure that all aspects of successful projects are covered and that all critical actions to find inherent potential for improvements are identified.

Your challenge

You are in a situation where you have a stake in the delivery of projects on time, budget and with the expected quality. To do this, you need increased knowledge of the projects ability to succeed with the current setup. You also need to understand the costs and risks related to this and to identify corrective actions early in order to meet your business goals.

Deliverables

The deliverables are:

- Report with overview of current situation and potential for improvement
- List of prioritized actions
- List of risks and challenges
- Executive brief for key personnel

Implementation model

- Information gathering – strategies, plans, etc.
- Interviews – with key personnel
- Analysis – with use of Syntell Capability model
- Documentation – report and executive brief
- Presentation – on-site presentation

Approximate time for project review: 2-3 weeks.

Example of Extended Support

We can provide extended support including e.g.:

- **Follow-on project reviews –**
Optimal effect is achieved if the reviews are performed in a series in order to –understand the effect of performed actions and development of risks.
- **Gain acceptance –**
We can deliver workshops in order to anchor the findings within the project and to support the project planning.
- **Increase knowledge –**
We can deliver competence development packages aimed at increasing the knowledge of the project team and to find common terminology.

Why Syntell?

Syntell has extensive experience in large projects that develop or procure complex systems. We are leading in our competence areas, and active in the development of international standards and other best practice. We have also successfully conducted Project Reviews for leading actors in areas such as defense, infrastructure and medical technology, which has resulted in substantial benefits for our customers.
